

Introducing the Boxer Shuttle family cargo trike with class leading safety features.....

If a stylish, mid-range cargo trike is what you're looking for, look no further. The Boxer Shuttle is everything a cargo trike should be: striking, sleek looks underpinned by a high level of British engineering and world first safety innovations.

We know cargo bikes and we know what our customers have been disappointed by with other brands. That is why we have designed the Shuttle to include these 'wish-list' items as standard. It comes with a rain cover, four padded seats with 5 point seatbelts, lights, secure underseat lockers and the all-important for hill climbing 250W electric drive system.

The Shuttle's usability can be further increased with Boxer's range of innovative optional accessories such as our children's bike rack, sunshade and baby buggy rack.

100% UK designed and built – and built tough

Like all Boxer trikes, the Shuttle is built with heavy duty Aluminium sections from scratch here in the UK. The Shuttle's integrated battery is hidden under the front seat, this preserves the trikes good looks with a clean rear end, making its appearance look streets ahead when compared to more traditional 'afterthought' e-bike systems supplied by other manufacturers.

The Shuttle has three locking hydraulic disc brakes which can be used as a handbrake to prevent the trike rolling away on hills. These brakes bring the Shuttle to a rapid stop- even in the wet.

Class leading innovations

Boxer's much revered 12 Volt safety light set can be added as an optional extra. This provides the trike with vehicle strength LED headlights, front and rear turn-signal indicators, stop/tail lights and a loud horn – all controllable from a single handlebar mounted cluster switch. With the addition of this option, the Shuttle appears and signals like a car providing a very high level of visibility and hence safety.

BOXER

Key features

- NuVinci constantly variable 'Automatic' gearbox on non-electric model
- Electric version has 7 speed gears and 250W electric hub motor with 13.4 Ah hidden battery.
- Padded removable child seats for four children with adjustable five point safety harnesses
- 2 x secure lockers under each child seat – store helmets locks and rain covers with ease
- 15 mph maximum motor speed (by pedalling harder speed can be increased)
- ~120kg maximum cargo load (270kg max gross weight – rider – 55kg bike = load capability)
- 5 hour battery charge costs just 7 pence with typical range of 15-25 miles
- Range can be extended by carrying more batteries or increased pedal assistance
- USB mobile device charging port on models fitted with 12V safety light set

Optional extras

- Full road safety lighting set with handlebar controlled front and rear flashing turn signals, horn, stop/tail, headlights and USB mobile device charging port.
- Children's Bike Rack for carrying children's bikes up to 1m wide
- Baby Buggy / Pushchair / Utility Rack adds an extra 25cm of load space to the front of the trike with anchor points and straps for carrying centre fold baby buggies or other luggage.
- Custom colour schemes and full 'wraps' for advertising your organisation
- Non road legal, high power motor kits available giving 4 x the power of road legal version.
- Dog Carrying Kit – removable front panel that doubles as a ramp for elderly dog access
